

Family Workstation

Family Workstation

A community solution for a very human need.

Product Background

The Fairfield Parent+Child Carrel design was based on insightful challenges from the staff of Henrico County Public Library for their Fairfield Area Library. The staff noticed that parents with toddlers or infants in strollers had no easy way to use the library’s adult reading room computer workstations. Further, their young children might disrupt the work of others using the library workstations. The library director, Barbara Weedman, and her staff wondered if Quinn Evans could help them find a solution.

The team at Quinn Evans, led by Senior Interior Designer Shannon Wray, called on TMC to create a custom workstation. Recognizing a need, sharing ideas and finding a solution: the Fairfield Parent+Child Carrel represents design collaboration and creativity at its best!

Family Workstation

Product Details

The Family Workstation offers a value-priced version of the Fairfield Parent+Child Carrel. We listened to our customers who suggested we also offer a lower-height, more open, and less expensive model. The Family Workstation offers that solution. Available in single- or double-faced units. Each workstation includes a wire chase, PVC-free vinyl mat, mirror and one Learning Panel. ImPrinted imagery on the exterior side panels is optional. Modifications may include a gate with latch that opens and closes and up to two additional Learning Panels on the play interior. The Family Workstation maintains all of the safety and durability standards as our Fairfield Parent+Child Carrel but at a lower price point.

Work + PLAY

2 can
PLAY too!

A safe and
engaging
PLAY space
with the
caregiver
close by

To give parents time for work, we designed a connected interactive space for the child that would keep them curious, exploring and entertained. Pictured are a few examples of our flat style Learning Panels.
